

# St Monica's Little Lightbulbs Breakfast

## Student Voice presents: What can robots and computers see?

Cameras are everywhere, and we all easily recognise people, objects and places in the photos and videos they make. But did you know its been nearly impossible to make a computer or robot recognise those same things? Well, that's now changed, and I will show you how, using different examples involving the planet Mars, recycling, and cricket.

Presented by Dr Mark McDonnell - scientist, engineer and inventor, in the area of AI technology.

Students are required to bring a parent and siblings younger than Year 3 are unable to attend. *Purchasing of breakfast is optional and proceeds will go towards Student Voice's designated charity: St Vincent de Paul. Unfortunately, we are unable to cater for various dietary requirements.*

**When:** Thursday 17<sup>th</sup> November

**Time:** 7:45am to 8:30am
